Claim Rejections - 35 USC § 112

Claims 11-14, 16 and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 11, 13 and 16 are drawn to inhibiting 20-hydroxyecosatetraenoic acid. These claims read on 20-hydroxyecosatetraenoic acid inhibition *in vitro*, 20-hydroxyecosatetraenoic acid inhibition in mammals with below normal 20-hydroxyecosatetraenoic acid, 20-hydroxyecosatetraenoic acid inhibition in mammals with normal 20-hydroxyecosatetraenoic acid, or in asymptomatic mammals with up-regulated 20-hydroxyecosatetraenoic acid. The specification fails to teach any benefit to be gained from such actions. Is extensive experimentation required on the part of a potential infringer to determine if his use of Applicants' inhibitor falls within the limitations of applicants' claim? *In re Kirk and Petrow*, 153 USPQ 48 (CCPA 1967). As the Supreme Court said in *Brenner v. Manson*, 148 USPQ at 696: "a patent is not a hunting license. It is not a reward for the search, but compensation for its successful conclusion." As U.S. Court of Customs and Patent Appeals stated *In re Diedrich* 138 USPQ at 130, quoting with approval from the decision of the board: "We do not believe that it was the intention of the statutes to require the Patent Office, the courts, or the public to play the sort of guessing game that might be involved if an applicant could satisfy the requirements of the

statutes by indicating the usefulness of a claimed compound in terms of possible use so general as to be meaningless and then, after his research or that of his competitors has definitely ascertained an actual use for the compound, adducing evidence intended to show that a particular specific use would have been obvious to men skilled in the particular art to which this use relates.”

Claims 12, 14 and 17 are drawn to a therapeutic method for treatment of a kidney disease, a cerebrovascular disease or a circulatory disease. Applicant's arguments and references have been fully considered. However, none of the references go as far as Applicants claims' that inhibitors of 20-HETE can treat any and all kidney, cerebrovascular and circulatory diseases.
